The Original AI

Aligned Intuition

Everyone's talking about AI these days. Whether you love or hate it, there's no stopping the fact that it's going to be a part of our human experience moving forward. That's going to introduce some big opportunities as well as some big challenges—the biggest of which is that the "new" AI is poised to take over the original AI: our Aligned Intuition.

Think about it: When was the last time you just sat quietly and allowed yourself to find an answer instead of picking up your phone or asking Alexa?

Sure, Artificial Intelligence is wonderful for giving us support on so many things, yet the one thing it will never have is the power of intuition: the innate human trait that guides our most important decisions and guides us through life. It also just so happens that intuition is a tool that few of us have ever learned how to use.

In this keynote, Melanie Spring will give us the tools to find our intuition, listen to it, and use it in our everyday lives to make powerful and confident decisions. Then she'll walk us through our lives and work to see where we are out of alignment with our intuition, who or what needs to shift, and what we need to do to stay in integrity with ourselves and the world around us.

By the time she's finished, you'll walk away with:

- Your very own individual set of intuitive skills
- Specific answers to what you're struggling with
- Alignment of your skills & talents with your purpose
- Steps to live a more fulfilling life afterward
- A deeper sense of connection to yourself and everyone else around you

Together, we'll tap into the original AI and find your very own Aligned Intuition.
